**Subject:** RE: Request for criminal investigation into crimes against humanity and genocide

Good evening Mr Fuller,

Your correspondence was indeed noted however due to the extent of your queries it requires careful consideration which are protracted and as I'm sure you can appreciate not alone.

I take note of your recent updates and can confirm it will be dealt with as expeditiously as time allows.

Regards

DS Marcus Bolam

Dear DS Bolam,

I appreciate that you need to obtain professional legal advice, but it is nearly a month since I wrote to you. When can I expect a reply?

While writing I will inform you of another case where people are attempting to stop key polluters from killing. I wasn't aware of this case when I last wrote, but it serves to underscore the fact that the primary victims (the young) won't take 'no/don't care' for an answer. Prosecutions are coming. See: -

<https://www.ukycc.com/climatecrime>

This will also have caught your eye, and the legal implications for those who are complicit in the most appalling crimes against humanity. Those who have the power to stop the killing, but refuse to use that power may wait many decades for their trials, but trials are coming: -
